Our Fifth Annual Catalogue

In presenting our Fifth Annual Catalogue it is with a feeling of genuine appreciation of the thanks we owe our many friends and patrons for their generous patronage in the past. For 1926 it will be our endeavor to conduct THE GARDEN HOUSE on a basis of Quality and Service worthy of this continued patronage.

Quality with us is always of first consideration. Our entire stock of Seeds, Bulbs, Fertilizers, Insecticides, Garden Implements and Sundries is exactly as represented, and guaranteed to be the best procurable. Our reputation is founded on a standard of quality, and we stand behind everything we sell.

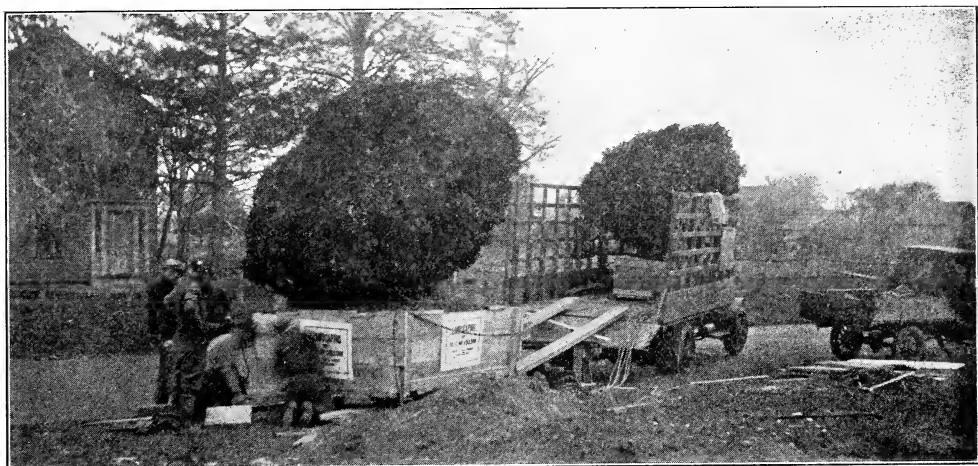

Service of the right kind to give satisfaction is our fondest ambition. Our stock is kept completely up-to-date at all times and we are therefore able to supply your needs in a prompt and satisfactory manner. Individual deliveries for each of our stores supported with a competent organization, enables us to give prompt despatch to all orders on a moment's notice.

We invite our friends to feel perfectly free to consult us with their various gardening problems. Please bear in mind that our experience and knowledge is always at your command and we deem it a pleasure any time to give helpful advice.

As weather conditions, and other factors over which we have no control, influence the growth and life of all vegetation, we make no guarantee for the life of seeds. We do however guarantee to supply the very best quality seed procurable, and with diligent care and proper culture, satisfactory results are assured.

The Garden House.

Landscape Gardening

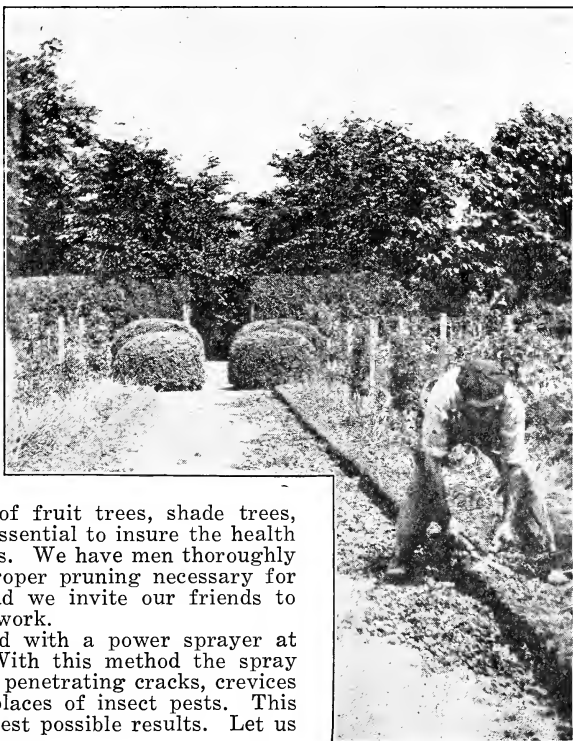

We have a competent organization for the prosecution of all landscape work; we design, lay out and completely install gardens, grounds, etc. All landscape work is handled with our own equipment—such as tractors, trucks and tree-moving apparatus of all kinds. We can execute any phase of this important task to the minutest details and will cheerfully furnish estimates for work of this character when called upon.

Garden Service

We maintain throughout the entire season a staff of competent, trained gardeners, capable of properly handling any problem in connection with the upkeep of a country home. Our patrons may have every confidence that their garden requirements will be properly taken care of through this service either on a daily or weekly basis.

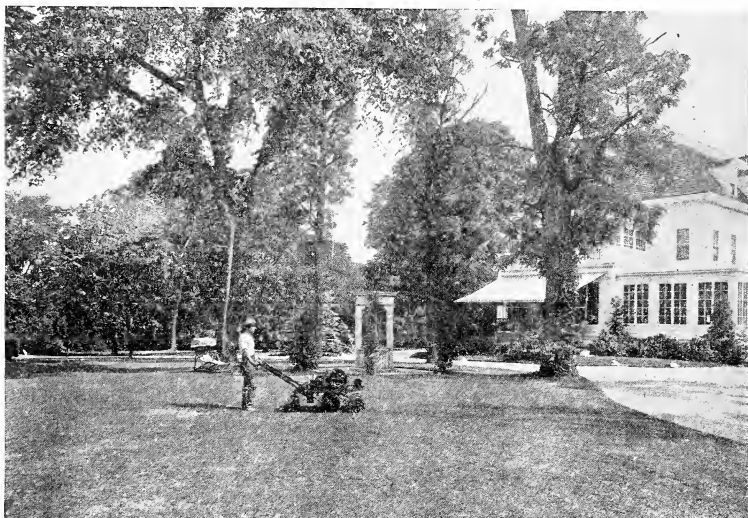

The pruning and spraying of fruit trees, shade trees, evergreens, shrubs, etc., is very essential to insure the health and productiveness of these plants. We have men thoroughly trained and familiar with the proper pruning necessary for any particular tree or shrub and we invite our friends to entrust us with this important work.

All our spraying is executed with a power sprayer at the proper time of the year. With this method the spray is applied under a high pressure, penetrating cracks, crevices and other hiding and breeding places of insect pests. This insures a thorough job and the best possible results. Let us take care of your spraying needs.

Grass Seeds of Quality

We guarantee our grass mixtures to be the very best obtainable. We purchase only seed of the highest purity and germination test, which cost more than the ordinary kind but will produce results.

Special Grass Mixtures

We make a specialty of preparing special grass mixtures for golf putting greens, fairways, tennis courts, and other purposes requiring a special grass mixture. We are always ready to advise and supply the best formulas adaptable for any grass seeding problem.

Sow 1 lb. to 300 sq. ft., 100 lbs. to the acre

We carry at all times a complete line of grasses such as Canada Blue, Kentucky Blue, Red Top, Timothy, Creeping Bent, Rhode Island Bent, Chewings Fescue, New Zealand Fescue, which are bought by test and not by guess work.

Permanent Pasture Mixture

A grass mixture suitable for the grazing of cattle or the laying down of fields for resting periods. 45c. lb.; 5 lbs. \$2.00; 10 lbs. \$3.75; 20 lbs. \$7.50; 100 lbs. \$35.00.

Sunnyside Grass Mixture

Our Sunnyside Mixture for lawns in sunny locations is a mixture that we know will produce gratifying results on

the light sandy soils of Long Island. lb. 55c.; 5 lbs. \$2.50; 10 lbs. \$4.50; 20 lbs. \$8.50; 100 lbs. \$40.00.

General List of Flower Seeds

Annuals

Annuals are raised from seed each year, mature their flowers and then die down the same season. The seeds can be either started indoors early or planted in the open ground when weather permits. They offer some of our finest cut flowers and can be used for all kinds of garden effects.

Biennials

The seeds of true biennials must be sown between June 1st and Sept. 1. With slight protection over the winter months they will bloom the following season and then die.

Perennials

Perennials flower the following year after sowing and continue to thrive and bloom every succeeding season. They are perfectly hardy and stay in the open ground all winter. For borders and old fashioned gardens, perennials offer the most excellent subjects.

**Lathyrus Latifolius
(Hardy Sweet Pea)**

These wonderful flowers should be more generally planted. They produce flowers on long stems suitable for cutting and once planted they are there to stay. Seeds can be supplied of all colors at 10c. per Pkt.; also strong flowering clumps from our nursery at 25c. each; \$2.50 per dozen.

Sweet Peas

The only important point to consider in cultivating Sweet Peas is to have good rich soil and sow the seed very early. March seeding is the best, because of the improbability of most amateurs starting that early, we have started in our greenhouse Sweet Peas in pots that can be set out May 1st and will do as well and even better than early outside sowings. Plants ready April 15th, 15c. each; \$1.50 per dozen. Pots contain three plants each and they should be planted about one foot apart.

The Spencer Sweet Peas are the best type to grow, the stems are longer, the flowers better developed, and in fact the entire growth is preferable to the old small flowering type. We, therefore, omit listing the older varieties. All the following varieties are the improved Spencer type.

Ornamental Evergreens and Shrubs

We will gladly help you in your planting problems. It is much better for those who don't know or haven't an experienced gardener to get proper advice before planting, as it is very necessary for those who plant to understand the character and habits of plants. Appointments can be made by telephone.

Evergreens of all kinds are the best materials for permanent landscape planting. They are always attractive and give a real setting to our home and its surroundings.

ABIES

The fir family are slow growers but attain a tremendous height. The prices range from \$2.00 upward, according to variety and size.

RED CEDARS

The common cedar of Long Island. One of the very best evergreens for massing and frontal plantings. Prices planted on your grounds:

6 to 10 foot.....	\$1.00 per foot.
10 to 15 foot.....	\$1.75 per foot.
15 to 20 foot.....	\$1.75 per foot.

JUNIPERS

A very diversified family of evergreens, comprising some very ornamental types. We carry about ten varieties of this kind in stock. Prices from \$1.00 upward according to type and size.

PICEA

The spruce family, quick growers and oftentimes used because of their cheapness. However, for wind breaks, screens and border plantings, they are most desirable. Prices range from \$2.00 upward according to sizes.

PINUS

The pine family contains some of our best evergreens, such as the Scotch and white pine, good for massing and informal work of all kinds. Prices range from \$2.00 upward.

RETINOSPORA

The Japanese cypress family. They are unquestionably one of the best types available for house planting and massing. They are dwarf, slow growers and can be clipped to confine them to a certain area. The different varieties give a wide range of colors in golden, steel blue, dark green, etc. Prices range from \$1.50 upward.

TAXUS

The yew is probably the real aristocrat of our commonly used evergreens. The dark lustrous foliage and its characteristic growth make it very popular and in great demand. Slow growing and high-priced but well worth it, for those who desire something pleasing and everlasting. Prices range from \$2.00 upward according to size and variety.

THUYA

The American Arbor Vitae, conical evergreen used in fall informal groupings and can be clipped for formal work of all kinds. Good, rugged evergreens for all around uses. Prices range from \$2.00 upward on the various varieties and sizes.

TSUGA

Our native hemlock, one of the most graceful of all evergreens. The fine dark green foliage and spreading habit make the hemlock very popular for all kinds of evergreen plantings. Priced from \$1.50 upward according to size.

FLOWERING EVERGREENS

This comprises Azaleas, Rhododendrons, Laurel, Andromeda, etc. Fine for mixing in evergreen borders or for frontal groupings of all kinds. Very high in price because of their slow growth. No planting is quite complete without a few of these colorful subjects. Prices range from \$1.50 upward.

PLANTS FOR HEDGES

Berberis, one of the most popular hedge plants, 50¢, 75¢ and \$1.00.

Privet for hedging, two foot, 10¢ each, \$8.00 hundred; three foot, 13¢ each, \$12.00 hundred; four foot, 15¢ each, \$14.00 hundred.

FLOWERING SHRUBS

All the various types of flowering shrubs are desirable for groupings of all kinds; in fact no place is complete without a collection of these useful and very ornamental plants. They are comparatively inexpensive and being quick growers will soon create landscape pictures that enchant any surroundings. We carry all the popular varieties, such as the Althea, Dogwood, Deutzia, the Euonymus, Forsythia, Syringa and Lilacs, the Viburnums, Weigelia, etc. Prices range from 50¢ to \$1.00.

How well the skilful gardener drew
Of flowers and herbs this dial new!
Where, from above, the milder sun
Does through a fragrant zodiac run;
And, as it works, th' industrious bee
Computes its time as well as we.
How could such sweet and whole-
some hours
Be reckon'd, but with herbs and
flowers!
